

MacOS Catalina: Resolving Adobe AIR Error

Step 2 of 3: Open Frameworks in Terminal

- a. Right-click on the Frameworks folder
- b. click on "New Terminal at Folder"

This will open a new Terminal window. It should look something like this:

MacOS Catalina: Resolving Adobe AIR Error

Step 3 of 3: Remove Quarantine Bits

- a. Type or copy and paste:
sudo xattr -d com.apple.quarantine "Adobe AIR.framework"
and press "RETURN"
- b. Enter your Mac login Password when prompted and press "RETURN".
